

S. A. I. Shouborno

PhD candidate in Electrical and Computer Engineering, University of Massachusetts Amherst
sasifimran@umass.edu | +1 774-535-9860 | shouborno.github.io | Google Scholar | GitHub | LinkedIn

Research interests

Interpretable and physics-informed machine learning for sensor data; wearable health sensing, including cuffless blood pressure and sleep-based cognitive screening; industrial cyber-physical systems; language models grounded in sensor data; efficient on-device inference.

Education

Ph.D., Electrical and Computer Engineering, University of Massachusetts Amherst Sep 2026 – May 2028 (expected)
Advisor Bashima Islam. Began at Worcester Polytechnic Institute in Aug 2023; transferred with the lab in 2026.

M.S., Electrical and Computer Engineering, Worcester Polytechnic Institute Aug 2023 – Dec 2025
GPA 4.00/4.00. Thesis: Interpretable and Efficient AI for Sensor-Rich Mobile and Embedded Systems.

B.Sc., Electrical and Electronic Engineering, Bangladesh University of Engineering and Technology Feb 2016 – Feb 2021
Thesis: Audiovisual emotion recognition using a multi-head attention network, advised by Celia Shahnaz.

Experience

Research Assistant, University of Massachusetts Amherst, Amherst, MA Sep 2026 – Present

- Cuffless blood pressure estimation from graphene electronic tattoo sensors, with the Kireev Lab.
- Fault diagnosis for industrial controllers from sensor and program trace data, with Bosch Research.

AI for Cyber-Physical Systems Intern, Robert Bosch LLC, Bosch Research, Pittsburgh, PA May 2025 – Aug 2025

- Built a contrastive multimodal model connecting vision, sensor, program trace and text data for language-guided few-shot functional state classification.
- Continued the project as a collaboration after the internship, leading to an IAAI-27 submission with Bosch co-authors.

Research and Teaching Assistant, Worcester Polytechnic Institute, Worcester, MA Aug 2023 – Aug 2026

- BASH Lab research on LLMs for IMU-based activity reasoning and on budgeted early-exit inference.
- Teaching assistant for the graduate course On-Device Deep Learning and three undergraduate ECE courses.

Machine Learning Engineer, Hishab Technologies, Dhaka, Bangladesh Feb 2021 – Jul 2023

- Built telephony conversational AI for Bengali speakers, covering speech recognition, text to speech, NER, language models and grapheme-to-phoneme conversion.
- Deployed services for banking and microfinance clients, including Bank Asia and Hitachi India.
- Co-inventor on a U.S. patent application for optimizing interactive voice response sessions.
- Worked with partner Chowa Giken (Japan) on car interior image enhancement.

Patent

T. Al Muntasir, M. T. Islam, **S. A. Imran**. **System and Method for Optimizing a User Interaction Session within an Interactive Voice Response System**. U.S. Patent Application No. 18/378,118, 2025.

Honors and awards

5th place, IEEE Video and Image Processing Cup at ICIP 2020 (real-time vehicle detection and tracking with fisheye cameras)	2020
4th place, IEEE Signal Processing Cup at ICASSP 2020 (unsupervised anomaly detection for autonomous drones)	2020
2nd place, IEEE Video and Image Processing Cup at ICIP 2019 (activity recognition from body cameras)	2019
National champion and 22nd worldwide, IEEEExtreme 12.0 programming contest (national champion in 2017 as well)	2018

Service

Chair, IEEE Signal Processing Society student chapter at BUET. Organized the 2019 IEEE SPS Winter School on Multimodal Signal Processing; the chapter grew into the largest in Bangladesh and received the IEEE SPS Student Branch Chapter Growth Reward.	2019 – 2021
IEEEExtreme ambassador and 2019 country lead for Bangladesh; ran programming workshops.	2017 – 2019

Skills

Machine learning: PyTorch, multimodal and contrastive learning, LLM fine-tuning, early-exit and efficient inference, physics-informed models

Signals: Biomedical signals (PPG, bioimpedance, sleep PSG), IMU, audio and speech, image and video

Systems: SLURM clusters, MLOps, GCP and AWS, Kafka, Jenkins, microcontrollers, FPGA
